## The Call to Action

The Future of Learning Accelerator is a five-week social innovation and action learning experience, where a selected group of university students, education leaders, tech professionals, policymakers, researchers, and high school students work together to re-imagine the future of learning in the AWASAR region.

Join one of the five multidisciplinary teams and co-design a solution to help 100 Million youth become lifelong learners, continuously employable, and secure a future of meaningful opportunities.

The five solutions developed during the Future of Learning Accelerator will be unveiled at Expo 2020 Dubai in March 2022 during the 100 Million Stars Summit.

## The Themes

Each team will focus on designing solutions for one of the following challenges faced by NextGen Learners:

- How might we create opportunities for youth to be connected with "relevant" jobs, apprenticeships & internship options?
- How might we help youth finance their lifelong learning journeys?
- How might we ensure that all students' knowledge, skills, and capabilities are recognized, verified, and shareable to lead them to greater employability, further skill-building & learning opportunities?
- How might we help youth be supported & connected to "future-forward" peers, mentorships & coaches that support their continuous work/learning journey?
- How might we help youth access emerging learning opportunities for technology and in-demand 21st-century skills?

## How it works

- 5-week program, meet 3 times a week + extra teamwork on completing weekly milestones on own time
- 100% online live instruction
- A collaborative action learning experience for social innovation
- Gain a certificate of completion
- Dedicated team coaching & mentorship
- Bootcamp facilitators available via zoom, slack, and Whatsapp

## Who are we looking for?

The Future of Learning Bootcamp isn't just for entrepreneurs or education majors. Whether you're eager to fast-track your transition into working on education, want to learn what it takes to get an idea to the pilot-ready stage, gain a real-world social entrepreneurial experience — or if you're just passionate about creating value in the future of learning and work for the AWASAR region - we are the community for you.

We are looking for university and school students studying or interested in working in the following areas:

- Education
- Human Resources
- Business management
- Marketing
- Finance
- Communications
- Emerging Technology (AI, blockchain, Virtual reality, Machine learning, app development)
- UX Design
- Education policy
